

# Steering Wheel Audio Control Interface Adapter

for Alpine, Pioneer, Sony, JVC,  
Clarion head units

Plug adapter for  
Blaupunkt head  
unit

Plug adapter for  
Kenwood head  
unit

Plug adapter for  
Panasonic,  
JVC2,  
Blaupunkt3

## Wiring

**Red:** Power +12 V (ACC)

**Black:** Power GND

**Brown:** Audio remote ground (SWG)

**Yellow:** Audio remote switch (SW1) for Toyota, Nissan, Honda, Subaru, Hyundai, Kia, Mitsubishi, Rover, Alfa Romeo

**Green:** Audio remote switch (SW2) for Toyota, Nissan, Mazda, Opel, Ford, Alfa Romeo

**White:** I-BUS input for BMW

**Blue, Gray, Violet, Black, Orange, Pink (grouped):** Renault 3x3 matrix keypad with roller

**Orange, Brown (grouped):** External optional infrared (IR) diode (orange: anode)

## Note:

1) In case of missing audio remote ground (SWG) connection point in given vehicle it is recommended to connect negative power (black) wire of the adapter to the point with less impedance for example to ground wire of lighter.

2) An optional plug adapter is required to connect steering wheel adapter equipped by Jack 3.5 connector to Blaupunkt, Kenwood and Panasonic head units.

3) To configure adapter for work with certain head unit brand use steering wheel buttons to type appropriate programming sequence listed in [table](#) on next page of this document. Configuration will not be cleared after power off. **Programming is possible only if steering wheel has all necessary buttons: “vol+”, “vol-”, “seek+”, “seek-”**

## Внимание:

1) В случае отсутствия отдельного провода со стороны автомобиля для подключения SWG рекомендуем подключать землю питания (черный провод) адаптера к точке с минимальным сопротивлением, например к отрицательному проводу прикуривателя.

2) Для подключения адаптера, оснащенного разъемом Jack 3.5, к магнитолам марок Blaupunkt, Kenwood и Panasonic, требуется дополнительный переходник.

3) Чтобы сконфигурировать адаптер для работы с требуемой маркой магнитолы нужно, используя кнопки на руле, набрать соответствующую последовательность из [таблицы](#) на следующей странице этого документа. Конфигурация сохраняется и после выключения питания. **Программирование возможно только при наличии всех необходимых кнопок: “vol+”, “vol-”, “seek+”, “seek-”**

↑, ▶▶ = Seek +

↓, ◀◀ = Seek -

"+" = Volume Up

"- " = Volume Down

\* (en) BMW\_ext: Turn On/Off usage of "R/T" and "Voice" buttons on BMW steering wheel as "Mute"(Att) and "Mode". Initially this option is OFF.

SeekPreSwap: Reassignment of buttons functions: swap around commands "Seek/Track" and "Preset/Disk/Folder". In case of presence of only "Seek+/-" buttons, initially short pressing is translated to "Seek/Track" command and prolonged pressing – to "Preset/Disk/Folder" command.

UsePhoneBtn: Send phone control commands. By default "On-hook/Off-hook" buttons on steering wheel causes sending of "Mute" command to head-unit.

\* (lv) BMW\_ext: **Aktivizēt/ deaktivizēt pogu "R/T" un "Voice" pogu izmantošu uz BMW stūres attiecīgi kā funkciju "Mute/ ATT" un "Mode". Sākotnēji šī iespēja ir deaktivizēta.**

SeekPreSwap: Pogu funkciju atkārtota iestatīšana: apmainīt vietām komandas "Seek/Track" un "Preset/Disk/Folder". Gadījumā, ja stūre aprīkota tikai ar "Seek +/-" pogām, sākotnēji īsie pogas spiedieni izpildīs "Seek/Track", bet garie spiedieni "Preset/Disk/Folder" funkciju.

UsePhoneBtn: Tālruna vadības komandu pārraide. Pēc noklusēšanas, "On-hook/Off-hook" stūres pogas izsauc komandu "Mute".

\* (ru) BMW\_ext: Активация/деактивация использования кнопок "R/T" и "Voice" на руле BMW в качестве "Mute"(Att) and "Mode". Изначально, опция деактивирована.

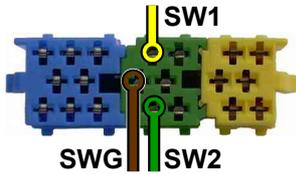

SeekPreSwap: Переназначение функций кнопок: обмен местами команд "Seek/Track" и "Preset/Disk/Folder". Если присутствуют только кнопки "Seek+/-", изначально, короткое нажатие передает команду "Seek", а длинное — "Preset".

UsePhoneBtn: Посылать команды управления телефоном. Изначально, кнопки поднятия/опускания трубки вызывают посылку команды "Mute".
