

CAN-OUT Steering Wheel Audio Control Interface Adapter

for Alpine, Pioneer, Sony,
JVC, Clarion head units

Plug adapter
for Blaupunkt
head unit

Plug adapter
for Kenwood
head unit

Plug adapter
for Panasonic
head unit

Wiring

Red:	Power +12 V (BAT)
Black:	Power GND
Pink:	CAN HIGH
Gray:	CAN LOW
Blue:	Amplifier activation (12 V input)
Gray/Black:	Optional resistive buttons input SW1
Brown:	Optional resistive buttons ground SWG
Yellow:	Accessory (ACC) *
White:	Light *
Violet:	Reverse *
Green:	Speed pulse (1 km/h -> 1 Hz) *
Orange:	Current output for external optional IR diode (anode)
Brown:	Ground for external optional IR diode (cathode)

* All 12 V outputs have short circuit and over temperature protection and current limit not less than 700 mA.

Note:

- 1) An optional plug adapter is required to connect Jack 3.5 equipped steering wheel adapter to Blaupunkt, Kenwood and Panasonic head units.
- 2) To configure adapter for certain head unit brand use steering wheel buttons to type appropriate programming sequence listed in [table](#) on next page of this document. Configuration will not be cleared after power off. **Programming is possible only if steering wheel has all necessary buttons: “vol+”, “vol-”, “seek+”, “seek-”**

Uzmanību:

- 1) Adaptera pieslēgšanai pie magnetolām Blaupunkt, Kenwood un Panasonic ir nepieciešamas atsevišķas pārejas priekš spraudņa Jack 3.5.
- 2) Lai konfigurētu adapteri priekš konkrētas magnetolas izmantojot stūres vadības pogas, nepieciešams ievadīt attiecīgo kombināciju rindu, kas paredzēta konkrētajai magnetolai. [Tabula](#) atrodas lapas otrajā pusē. Konfigurācija saglabājas arī pēc barošanas atslēgšanas. **Programmēšana ir iespējama, ja ir visas pogas, ko izmanto programmēšanas procesā, tās būtu, “vol+”, “vol-”, “seek+”, “seek-”.**

Внимание:

- 1) Для подключения адаптера, оснащенного разъемом Jack 3.5, к магнитолам марок Blaupunkt, Kenwood и Panasonic, требуется дополнительный переходник.
- 2) Чтобы сконфигурировать адаптер для работы с требуемой маркой магнитолы нужно, используя кнопки на руле, набрать соответствующую последовательность из [таблицы](#) на следующей странице этого документа. Конфигурация сохраняется и после выключения питания. **Программирование возможно только при наличии всех необходимых кнопок: “vol+”, “vol-”, “seek+”, “seek-”.**

↑ , ▷ = Seek + ; ↓ , ◀ = Seek - ; “+” = Volume Up ; “-” = Volume Down.

* (en)

SeekPreSwap: Reassignment of buttons functions: swap around commands “Seek/Track” and “Preset/Disk/Folder”. In case of presence of only “Seek+/-” buttons, initially short pressing is translated to “Seek/Track” command and prolonged pressing – to “Preset/Disk/Folder” command.

UsePhoneBtn: Send phone control commands. By default “On-hook/Off-hook” buttons on steering wheel causes sending of “Mute” command to head-unit.

* (lv)

SeekPreSwap: Pogū funkciju atkārtota iestatīšana: apmainīt vietām komandas “Seek/Track” un “Preset/Disk/Folder”. Gadījumā, ja stūre aprīkota tikai ar “Seek +/-” pogām, sākotnēji īsie pogas spiedieni izpildīs “Seek/Track”, bet garie spiedieni “Preset/Disk/Folder” funkciju.

UsePhoneBtn: Tālruna vadības komandu pārraide. Pēc noklusēšanas, “On-hook/Off-hook” stūres pogas izsauc komandu “Mute”.

* (ru)

SeekPreSwap: Переназначение функций кнопок: обмен местами команд “Seek/Track” и “Preset/Disk/Folder”. Если присутствуют только кнопки “Seek+/-”, изначально, короткое нажатие передает команду “Seek”, а длинное — “Preset”.

UsePhoneBtn: Переключение режимов работы кнопок управления телефоном. Единственная кнопка “Phone” может работать как “Mute”. В случае наличия двух кнопок управления телефоном в альтернативном режиме кнопка поднятия трубки Off-Hook коротким нажатием поднимает, длинным кладет трубку, а кнопка опускания On-Hook работает как Mute.

Document History

Doc. Rev.	Firmware	Date	Description
1.22		02.12.2017	Ford Focus 2011
1.21	#1381	03.11.2017	Fiat Bravo 2011, Honda Civic 5d 2012
1.20		17.07.2017	Mercedes-Benz ML class 2005-2011
1.19		14.06.2017	Change colors of wires: Blue→Violet, Red→ Blue, CAN is now Pink and Gray.
1.18	#1111	22.09.2016	Chrysler Voyager 2008
1.17	#1223	22.09.2016	Dodge Nitro SXT 2007
1.16	#1046	02.08.2016	Citroën Jumpy 2011
1.15	#1046	05.07.2016	Toyota Proace 2014; translation to Latvian on first page
1.14	#1209	20.06.2016	Honda CR-V 2013; actual limit is 700 mA per output
1.13	#1166	12.02.2016	Dodge Durango
1.12	#1150	29.01.2016	Citroën Jumper, VW Passat, Dodge Avenger
1.11	#1126	11.01.2016	Blaupunkt3: adaptive to resistive buttons: control through Jack
1.10		30.10.2015	Sort connectors alphabetically
1.9		30.10.2015	Add connectors: Volkswagen, Mercedes, Volvo, Renault, Jeep, Alfa Romeo, Mazda, Audi, Porsche, Ford, Peugeot; unification of connection lines.
1.8	#1078	22.08.2015	JVC2
1.7	#1066	08.04.2015	AmplifierCAN: SW buttons control VOLUME and FADER settings of original audio amplifier (if it exists) by CAN packets instead of HU parameters by Jack connection
1.6	#989	26.11.2014	Kenwood2 and Clarion2, Document History
